

# TOP 10 BENEFITS

## Go Underground with Confidence

- Removes architectural and acoustic design constraints
- Ideally suited for high-volume spaces and displacement ventilation applications
- Engineered system supplied complete from the slab down
- Leak testable
- Pre-insulated, R-10 equivalent
- Non-corrosive, resistant to mold and mildew
- Short lead times
- Meets all national codes
- Free install training
- BlueDuct design drawings supplied

NSF Certified for R-10  
Equivalent Thermal Performance
