

Think THE BLUEDUCT® for your next residential design!

ARCHITECT BENEFITS

Save Your View. GO BLUE. BLUE Is The New GREEN.

- Buried duct leaves ceiling space available to design open floor plans
- R-10 thermal equivalent performance designed to go underground
- Long lasting polyethylene material will not corrode with low VOC emissions which maintains IAQ through passive displacement ventilation
- Complete system to finished floor with sealed boots and diffuser boxes to ensure a leak testable system to zero leakage
- Designed for leak testing - IMC9 Section 603.8.2 and H.E.R.S. testing
- Manufacturer provided system drawings to ensure trouble-free installation
- Manufacturer provided webinar training and on-site training for contractors to ensure proper installation!

Go Underground to Design Beautiful Spaces

AQC understands that Architects cannot sacrifice performance or design in their projects. With The BlueDuct you don't have to. Take advantage of the R-10 TDE performance and flexibility to place duct underground and out of site allowing you to design beautiful open spaces and full floor to ceiling windows without compromise.

Indoor Air Quality and Efficiency

The BlueDuct's proprietary manufacturing technique uses polyethylene material formulated to give the product superior thermal properties in addition to a thermal mass component that provides excellent overall thermal efficiency. The BlueDuct is engineered to be a complete system with a full complement of sealed boots and diffuser boxes that extend all the way to the finished floor. The BlueDuct can be leak tested with the highest degree of confidence knowing you are not compromising the IAQ of your building overtime. AQC is the only manufacturer that provides a complete system on every project, making AQC a one stop shop. An independent study from a DOE report shows that deeply buried ducts are 20-30% more efficient than an unvented attic system. Using the Earth as an insulator, allows for lower costs of designing and building higher performance homes.

Saving You Time and Delivering Quality Duct

AQC knows that your time is your most valuable asset. This is why we make working with BlueDuct easy. As industry advisors, we provide you with complete drawings and work with your contractors to ensure they are fully trained on our installation process before they get to the job site. AQC brings quality products to your customers that will withstand the test of time while spotlighting your unique building design!
